Course Description:

This course is the second of the second-year Greek series, designed to solidify the grammatical concepts learned in first-year while introducing students to the study of actual ancient literary texts. In this course we will focus on ancient Attic prose by reading from Lysias on the Murder of Eratosthenes as well as a Platonic dialogue. We will pay close attention to grammar and style, but we will also gain insight into the complexities of ancient Athenian culture, politics, and religion.
